SUMMARY

Software developer with a recent focus on mobile and front-end development. Experienced in cross-platform mobile apps using Ionic, React Native, and mainly Flutter. Strong knowledge in front-end web development with Angular. I've also contributed to backend projects using GraphQL and REST APIs with Java and Spring Boot. Passionate about building efficient, scalable, and user-friendly software solutions.

PROFESSIONAL EXPERIENCE

Gestor

November 2023 – Present

Collaborated on financial software development using Angular (front-end) and Spring Boot (back-end) within multidisciplinary teams.

- Developed user interfaces with Angular, applying best practices in architecture and usability.
- Implemented business rules and server logic using Java and Spring Boot.

Freelancer

November 2023 – Present

Freelance mobile app developer using Flutter, creating intuitive products tailored to client needs.

- Full design and development of cross-platform mobile applications using Flutter, from UI to business logic.
- Integrated backend services (REST API, Firebase) and deployed apps on Google Play and App Store.

Icarus

May 2022 – October 2023

Co-founder and mobile developer at Icarus, participating in various collaborative projects focused on Flutter. Developed scalable, efficient apps with modern interfaces and strong user experience orientation.

- Designed and implemented modern, responsive UIs with Flutter.
- Integrated complex functionalities using custom widgets, state management, and animations.

NousClic

August 2020 – January 2021

Responsible for mobile app development using Ionic and React Native, led the implementation of efficient, adaptable solutions for multiple platforms.

- Integrated REST APIs for backend communication.
- Used native device capabilities (Camera, Geolocation, Push Notifications).

PROJECTS – FREELANCER

- **Te ayudo app:** App developed with Flutter to help children with ASD through pictograms.
- **Cota City:** App developed with Flutter for a football school in Cotacachi.

EDUCATION

- **Software Engineering** - Universidad Técnica del Norte
- **High School** - Colegio Diocesano Bilingüe
